

We would like to rent your roof, parking space, land and/or building facade and build a cleantech EE-system power plant at our expense. This can be a PV photovoltaic solar system, a wind turbine, a hydroelectric water power plant or a biomass system.

The logo for cleantech-project.org features the text "cleantech-project.org" in a sans-serif font. The word "cleantech" is in a light brown color, "project" is in a darker brown, and ".org" is in a very dark brown. To the right of the text is a solid brown square.

Optionally, we also install an auto electric filling station, storage battery or heating. This way you get your own eco power immediately and in the long term and receive additional rental income from us. You can buy our installation from us at any time.

Your benefit as land, property and building owner when working with us

- a. You benefit from "your own cheap" electricity on your property without investment costs.
- b. You can buy the plant from us at any time and take it into your ownership.
- c. You benefit from very favourable long-term fixed energy prices up to 30 years. These are usually 10 - 20 % below the prices you pay today. This is a rising trend, as electricity prices rise by approx. 2 % per year. <https://www.strompreis.elcom.admin.ch/BaseDataSelection.aspx>
- d. You will receive an annual rental income on the space we rent from you. Up to 1 per m2 for up to 30 years.
- e. You will receive an annual electricity feed-in revenue from the excess electricity not consumed by yourself, which is fed into the electricity grid. Up to 2% of the yield for up to 30 years.
- f. You will receive a one-time project bonus on commissioning based on the installed kWp peak power. Up to 10 per installed kWp capacity.
- g. You also benefit from an interesting indirect increase in value and better resale opportunities for your property.
- h. They become up to 100 % independent of the electricity company. Also through the use of state-of-the-art storage technology. However, you remain connected to your EW.
- i. You avoid CO2 emissions and help the earth to remain worth living for you, your children, grandchildren and fellow human beings.
- j. You protect the environment and the future of your children, grandchildren and fellow human beings.
- k. You will support Switzerland or your country in the security of electricity supply and in the transformation of energy systems.
- l. You get "best in class cleantech technology" which is market proven, reliable and innovative. You can use this information for marketing purposes.

- m. Your **neighbours** can also **benefit** from your favourable long-term fixed energy prices for "your" plant. Annual current savings of between 10 - 20 %.
Tendency rising, since the electricity prices rise annually approx 2 %. <https://www.strompreis.elcom.admin.ch/BaseDataSelection.aspx>
- n. You have nothing to do with the planning, construction, operation, maintenance, financing or insurance of the installation. **Therefore you do not take any risks.**
- o. You always **have a say** and only a small effort, namely to sign the necessary documents (building permits etc.).
- p. They may **also participate in the plant of "their" project company (SPV) with 10 - 90 %** and receive even cheaper electricity. This in the same % ratio as your participation.
- q. We are also happy to install **e-charging stations** at our own expense, replace oil or gas heating with a **heat pump heating system** or **realise cost savings** for you, also via "peak shaving".
